

## MASSAGE MODES: FOUR TYPES

**A:**  
In this mode, only a single chamber is inflated at a time. Starting from the chamber ① and working up to the chamber ⑥. Then the cycle repeats.

**B:**  
In this mode, the chamber ① stays inflated. It gradually adds a chamber until all six chambers are filled with air. Then the cycle repeats.

**C:**  
In this mode, chamber ① inflates & deflates 4 times, then holds pressure; next chamber ② inflates & deflates 4 times, chamber ① ② hold pressure; chamber ③ inflates & deflates 4 times, chamber ② ③ hold pressure, chamber ① deflates; chamber ④ inflates & deflates 4 times, chamber ③ ④ hold pressure, chamber ② deflates; working as this way up to chamber ⑥. Then the cycle repeats.

Note: Under this mode, for the FIRST CYCLE, it works as mode B to warm up; from the 2nd cycle on, it works as PULSE mode C.

**D:**  
In this mode, all chambers inflates together, and deflates together. Then the cycle repeats.
